## biography

Tsepo's recent years allowed him to reflect and rekindle his passion for music. He's now dedicated to creating music without constraints or expectations. Inspired by his early musical influences and exploration beyond the club scene, he's gained a deeper understanding of mood and emotion in music. His sets are known for their hypnotic quality, with gradual build-ups and a captivating journey.

From his time at Amsterdam's Trouw and Shelter to his current residency at De School, Tsepo likes his DJ sets to evolve over more than five hours, taking dancers on a transformative journey. His "Realising Stuff" radio shows are diverse and coherent, telling compelling stories.

Tsepo's agency bio humorously mentions "realising stuff." Still, with his renewed focus and love for his craft, he's happier than ever with his work.
