biography

HVOB have been conquering the universe of electronic music for years. In recent years, HVOB have not only established themselves in the international music scene through their releases, but also as a live act.

They play sold-out tours in North, Central and South America, Asia, Europe and South Africa and have played at all the world's renowned festivals - from a headlining show at Sonar Barcelona and Cloackenflap in Hong Kong to Burning Man, Primavera and Fuji Rock in Japan. They have also recorded a BBC Essential Mix, several Boiler Rooms and a Cercle set in Mexico.

The two musicians behind HVOB are Anna Müller and Paul Wallner. Together they compose and produce the music and are therefore jointly responsible for the unique sound of HVOB.

After five studio albums and one live album, the international electronic duo HVOB is expanding the spectrum of its means of expression by an additional dimension: the new artistic cycle, the new track "What They Gave Me" and the upcoming world tour starting in 2025 will be characterized by the light show THE SILVER CAGE created by HVOB. The light show that gives the cycle its name is the result of an exploration of the possibilities of an even stronger visual complement to music than HVOB have already done.
